EDUCATION:

2009.10 – 2013.9 University of Glasgow, Ph.D in Cognitive Neuroscience, Thesis title: “Tracking the temporal dynamics of cultural perceptual diversity in visual information processing”. Supervisors: Prof. Roberto Caldara; Prof. Lars Muckli.

2005.9 – 2009.6 Sun Yat-Sen University, B. Sc. in Psychology. Thesis title: “Control deprivation and styles of thinking”. Supervisors: Prof. Xinyue Zhou.

Software and algorithms:

iMap4 – Linear Mixed Model solution for statistical fixation mapping of eye movement data. It is a data-driven statistics Matlab toolbox implementing linear mixed model and non-parametric statistics based on permutation and bootstrap spatial clustering. It also has a full graphical user interface. *iMap4* is one of the three finalists of the SMI Computing Competition in ECEM 2015.

Strategy quantifier for face viewing – It is a Bayesian Generative model for quantifying the face viewing strategy (global or local). Using Gaussian Mixture Models, it quantifies a given observer’s fixation strategy during free-viewing of face stimuli base on the fixation location information only. It output a scale value between 0 and 1 to indicate how global or local the observer is.

Convolution-based algorithm for eye movement event detection.

EMPLOYMENT:

2013.9 – present Post-doc in University of Fribourg. I am supported by the Swiss National Science Foundation (n° 100014_138627 and n° 100014_156490/1)

2012.9 – 2013.9 Research assistant in University of Fribourg. I was supported by National Center of Competence in Research (NCCR) Affective sciences financed by the Swiss National Science Foundation (n° 51NF40-104897).
