Education and Professional History:

- **2013.9 present** Post-doc in University of Fribourg. I am supported by the Swiss National Science Foundation (n° 100014_138627 and n° 100014_156490/1)
- **2012.9 2013.9** Research assistant in University of Fribourg. I was supported by National Center of Competence in Research (NCCR) Affective sciences financed by the Swiss National Science Foundation (n° 51NF40-104897).
- **2009.10 2013.9** University of Glasgow, Ph.D in Cognitive Neuroscience, Thesis title: "Tracking the temporal dynamics of cultural perceptual diversity in visual information processing". Advisor: Prof. Roberto Caldara and Prof. Lars Muckli.
- **2005.9 2009.6** Sun Yat-Sen University, B. Sc. in Psychology. Thesis title: "Control deprivation and styles of thinking". Advisor: Prof. Xinyue Zhou.

Software and Algorithms:

iMap4 – Linear Mixed Model solution for statistical fixation mapping of eye movement data. It is a data-driven statistics Matlab toolbox implementing linear mixed model and non-parametric statistics based on permutation and bootstrap spatial clustering. It also has a full graphical user interface. **i**Map4 is one of the three finalists of the SMI Computing Competition in ECEM 2015.

Strategy quantifier for face viewing – It is a Bayesian Generative model for quantifying the face viewing strategy (global or local). Using Gaussian Mixture Models, it quantifies a given observer's fixation strategy during free-viewing of face stimuli base on the fixation location information only. It output a scale value between 0 and 1 to indicate how global or local the observer is.

JAEFA - Convolution-based algorithm for eye movement event detection
